Farm Management Software

Apex is software that lets you turn data you've collected in the field into intelligent, well informed decisions back at the office. Apex works with data and applications from your GreenStar System.

Navigation is simple and easy once you are comfortable with the system - SCE trained consultants are here to educate you and be of assistance so you are comfortable!

Apex Record Keeping enables recorded data to be used to make sound business operating decisions.

- apply pricing info to all recorded data
- apply misc expense
- apply misc income
- apply crop share info that is applied to field summary report
- Enhanced decision making reports
- financial maps

Apex helps improve management decisions

By using Apex, producers can visualize the farming practices and productivity of past years and use that information to make important decisions for the next production year and beyond.

The outcome will maximize profit, maximize
