## What is JDLink??

**Basically JDLink allows you to Farm from afar!**

JDLink telematics solutions lets you track all your machines and applications wherever you have an internet connection.

Whether you manage an entire fleet of equipment, or your own equipment the challenge is always to keep the equipment in prime condition, manage costs, promote efficiency and protect your investment. With JDLink and Remote Access Display, accomplishing these tasks can be simple. SCE can use the JDLink system to connect to your tractor and retrieve diagnostic trouble codes, diagnostic recordings and maintenance data. Once our service techs have done the diagnostics, they are able to take the correct parts needed for greater efficiency and uptime.

**JDLink gives YOU  
the freedom to run  
your business in  
completely new  
ways!**

With JDLink Ultimate you get the hard facts- you can see how the machines are being utilized with analysis of engine load for better working efficiency. You can set alerts on individual machines so you'll know if fuel consumption is above a certain level.

### JDLink Ultimate:

- Machine location
- Geofencing
- Machine Hours
- Maintenance Plan
- Fuel Consumption
- Machine Utilization
- Machine Diagnostics
- Service Advisor Remote capable

### A Virtual Technician with Service Advisor Remote...

Now you can allow SCE to remotely access your machine's diagnostic system via JDLink. It's like having your own personal in-field technician who travels with your machine.

**Save time on repairs!**

*Supporting Your business efficiency and profitability*
